Cenikor’s Adolescent Inpatient program provides treatment and education to adolescents ages 13-17 and their families whose lives have been impacted by substance use disorders. Cenikor offers comprehensive and quality services to achieve lasting changes in the values and behaviors of youth, to create healthy lifestyles and healthy families.

Clients learn how to live with structure as behaviors and attitudes are addressed by peers and counselors. In addition to individual, group and family therapy, teens continue their education with qualified teaching staff in our on-site accredited school. We guide them on their recovery, helping them grow into responsible adults in long term recovery, while they learn how to have fun in a sober environment. Contact us today to learn more.

Fees for services vary. Most insurance plans accepted. Call 1.888.CENIKOR to discuss your insurance benefits or private pay options.

All inquiries about admissions and referrals are confidential.

Cenikor welcomes donor support.
